Objective

Anticipating an opportunity that would simply extract the very best of me, thereby continuing in me the interest and inspiration to do better.

Work experience

Backend Developer   September 2021 - Present

Wolken Software Pvt Ltd.

Working for the application Enterprise IT Service Management, which uses

- Spring Boot as framework with Java programming language
- Hibernate as the ORM tool
- MySQL as database.

and involves

- understanding new requirements
- planning estimations of new requirements
- developing new features
- resolving issues and enhancing them
- continuous development via Jenkins

Projects

1. **Gupta Automobiles**

   Gupta Automobiles is a dual project which includes a website and an android app. The website is based on the famous Python framework Django, which uses Django REST Framework for providing RESTful services, SQLite as database, Bootstrap and CSS for styling the look, JavaScript for advanced view functionality and AJAX for asynchronous calling used for searching.
   And the android app uses Java as primary coding language, which uses YouTube library for videos, functionality to change the theme of the app, etc.
